

T023

Information

- Dataset name: Freight Transport - Tonne-km for Aviation (Domestic)
- Link to cleaning script:
[https://github.com/linero-tech/item-internship/blob/main/code/sandra/T023_TAS_FRA_007\(2\).ipynb](https://github.com/linero-tech/item-internship/blob/main/code/sandra/T023_TAS_FRA_007(2).ipynb)

Source

Asian Transport Outlook Database (ATO2023 TAS-FRA_007(2) dataset is downloaded in November, 06, 2023)) <https://data.adb.org/dataset/asian-transport-outlook-database> - ATO2023 TAS-FRA_007(2)

Country and ISO Code

The ISO Code is used for mapping country and region names

ITEM Region

All countries belong to an ITEM region.

Variable

The variable is set to *Freight*.

Country and ISO Code

The ISO Code is used for mapping country and region names

ITEM Region

All countries belong to an ITEM region.

Unit

The unit is changed from Million tonne kilometers to 10^9 tonne-km / yr

Mode

The mode is *Aviation(Domestic)*.

Vehicle Type

The Vehicle is *All*

Technology

The dataset does not provide any information about Technology, therefore, the values is set to *All*.

Fuel

The dataset does not provide any information about Fuel, therefore, the values is set to *All*.
