Information

- Dataset name: Vehicle registration (LDV)
- Link to cleaning script:
  https://github.com/linero-tech/item-
  internship/blob/main/code/sandra/T022_TAS_VEP_017.ipynb

Source

Asian Transport Outlook Database (ATO2023 TAS-VEP-017 dataset is downloaded in November, 06, 2023)) https://data.adb.org/dataset/asian-transport-outlook-database - ATO2023 TAS-VEP-017

Country and ISO Code

The ISO Code is used for mapping country and region names

ITEM Region

All countries belong to an ITEM region.

Variable

The variable is set to *Stock*.

Country and ISO Code

The ISO Code is used for mapping country and region names

ITEM Region

All countries belong to an ITEM region.

Unit

The unit is changed from Number to 10^6 *vehicle*

Mode

The mode is *Road*.

Vehicle Type

The Vehicle is *LDV*

Technology

The dataset does not provide any information about
Technology, therefore, the values is set to *All*.

Fuel

The dataset does not provide any information about
Fuel, therefore, the values is set to *All*.

Data Cleaning

The following column names are removed from the datasets

- Remarks
- Source (2022-04)
- Source (2021-10)
